

Enabling the Future

e-NABLE is a global network of volunteers that use 3D printers to print prosthetic hands for people who need them. Since 2013, over 5500 members have donated hands to people in over 40 countries. Daniel Dugan, a local member, will bring a printer, show videos of hands in use, and will bring some hands to assemble. Open to all ages.

Wednesday, August 5, 6:00 p.m.
